

comida GAc **A** FORMULA

For the Dietary Management of Glutaric Aciduria type I in
INFANTS IN THE FIRST YEAR OF LIFE

- Supplies an amino acid mixture of high biological value free from lysine and low in tryptophan
- Contains lactose and LCP, free from sucrose
- Provides vitamins, minerals and trace elements
- Easy to prepare

DESCRIPTION

comida-GAc A formula with LCP is a formula free from lysine and low in tryptophan for the dietary management of glutaric aciduria type I. It contains carbohydrates and a special fat blend containing long chain polyunsaturated fatty acids (LCP), and is supplemented with vitamins, minerals, trace elements and specifically enriched with L-carnitine.

INDICATIONS

For the dietary treatment in infants with glutaric aciduria type I (glutaryl-Co A dehydrogenase deficiency).

RECOMMENDED USE

The daily amount of comida-GAc A formula needed depends on age, body weight and individual metabolic condition.

The dose of comida-GAc A formula is to be monitored and must be adjusted by the physician regularly.

The daily amount required should be divided into 3 to 5 single portions and should be taken mixed also with food or beverages allowed in calculated amounts.

Preparation table:

Drinking volume	Water	comida-GAc A formula		Protein content
ml	ml	g	= No. of scoops*	= g Protein equivalent
35	30	4,3	1	0,51
100	90	13	3	1,5
200	180	26	6	3,1

* 1 scoop = approx. 4,3 g comida-GAc A formula

IMPORTANT NOTICE:

- Not suitable as sole source of nutrition
- Must be used under medical supervision
- Not to be used by individuals without glutaric aciduria type I
- For infants with glutaric aciduria type I
- Not suitable for parenteral use
- Not to be used by individuals with lactose intolerance

comida-GAc A formula is free from any preserving agent, colourings or sweeteners
