

comida **MSUD A** FORMULA

For the Dietary Management of disorders in
branched chain amino acid metabolism in
INFANTS IN THE FIRST YEAR OF LIFE

- Leucine, isoleucine and valine free amino acid mixture
- Contains lactose and LCP, free from sucrose
- Provides vitamins, minerals and trace elements
- Easy to prepare

DESCRIPTION

comida-MSUD A formula with LCP is an isoleucine, leucine and valine free formula for the dietary management of disorders in branched chain amino acid metabolism in infancy. It contains carbohydrates and a special fat blend containing long chain polyunsaturated fatty acids (LCP). comida-MSUD A formula is supplemented with vitamins, minerals and trace elements.

INDICATIONS

For the dietary treatment in infants with disorders in metabolism of branched chain amino acids, such as Maple Syrup Urine Disease (MSUD).

RECOMMENDED USE

The daily amount of comida-MSUD A formula needed depends on age, body weight and individual metabolic condition.
The dose of comida-MSUD A formula is to be monitored and adjusted by the physician regularly.
The daily amount required should be divided into 3 to 5 single portions and should be taken mixed also with food or beverages allowed in calculated amounts.

Preparation table:

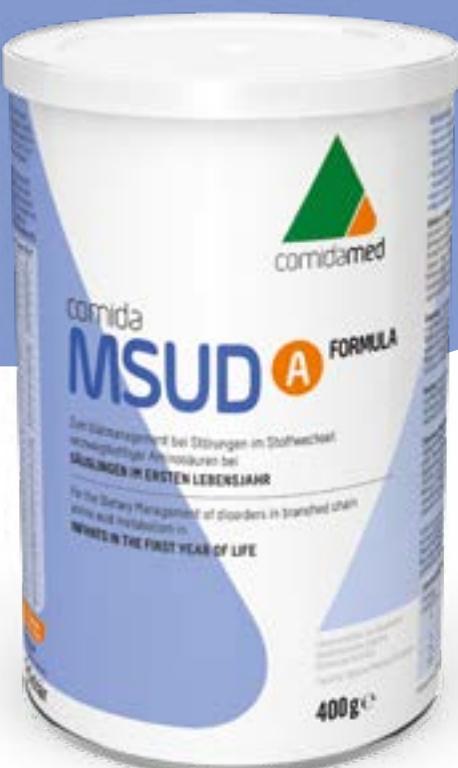

Drinking volume	Water	comida-MSUD A formula	Protein content
ml	ml	g	= No. of scoops* = g Protein equivalent
35	30	4,3	1 0,51
100	90	13	3 1,5
200	180	26	6 3,1

* 1 scoop = approx. 4,3 g comida-MSUD A formula

IMPORTANT NOTICE:

- Not suitable as sole source of nutrition
- Must be used under medical supervision
- Not to be used by individuals without disorders in branched chain amino acid metabolism
- For infants with disorders in branched chain amino acid metabolism
- Not suitable for parenteral use
- Not to be used by individuals with lactose intolerance

comida-MSUD A formula is free from any preserving agent, colourings or sweeteners
